

## 2020-2021

**Name of the Department/Society:** Internship Cell

**Name of the Event 3:** Basics of research and paper publication

**Date of the Event:** 26.09.2020

The Internship Cell, in collaboration with Team Research Bulb, organized an enlightening webinar on the topic – “Basics of Research, Publication and the Scope of Research.” The webinar was relevant to students from all walks of life.

The webinar was conducted by Prof. Bharat Kwatra, who is currently a visiting professor at Sabarmati University. He is an affiliated member of the International Union of Pure and Applied Chemistry (IUPAC) and is also pursuing his doctorate in Hungary.

The session answered the questions such as what is the basic process of undertaking a research study, how can one start, what is the primary skill-set required to begin, as well as what kind of attitude should a person uphold while working on their study. He suggested that the pandemic provides the best opportunity and ideal time to commence a research project.

He guided the audience regarding the Methodology for paper publication and shared useful insights on how to find appropriate journals to represent one's work. He also shed some light on citation style required.

The session was remarkably informative and interactive. We hope to bring more such informative initiatives on board.
