NAAC ACCREDITED 'A++' GRADE COLLEGE

2025-26

Ordinateur: The Computer Science Society of Hansraj College organised “**Project Ultron: The Ultimate Escape Room Challenge**” under **Confluence 2026**, on **8th April 2026** in Room **C-208**. Designed as an immersive and intellectually stimulating event, the escape room aimed to challenge participants’ **logical reasoning, analytical thinking, and teamwork** in a high-pressure, gamified environment.

The event was built around a fictional and engaging storyline inspired by the **Marvel universe**. Participants were introduced to a simulated scenario through a directive from Nick Fury, where Ultron was depicted as having resurfaced and attempting to upload itself onto the global internet. The event witnessed enthusiastic participation from **21+ teams** owing to **65+ participants**, each bringing a unique combination of **strategy, creativity, and problem-solving skills**. The escape room was carefully structured to ensure that every stage tested different aspects of critical thinking and collaboration.

The escape room consisted of **3 interconnected clues** designed to gradually build complexity. Each clue required teams to observe minute details, identify hidden patterns, and logically connect pieces of information to move forward. The clues were not straightforward and were intentionally layered to create confusion and misdirection, encouraging participants to think beyond obvious solutions. As teams progressed through the clues, the difficulty level increased, requiring not only individual intelligence but also effective communication and coordination within the team. The environment was filled with excitement and urgency, as participants actively engaged in decoding messages, discussing interpretations, and testing different possibilities under time constraints.

Out of the 21 participating teams, **only ONE team successfully managed to identify and solve all the clues**, showcasing exceptional analytical ability, attention to detail, and teamwork. Additionally, **three teams were able to successfully find the first clue**, demonstrating strong logical reasoning and collaborative effort. The remaining teams, despite facing challenges, contributed to the vibrant and competitive atmosphere of the event, making it an engaging experience for everyone involved. The escape room not only tested participants’ technical and logical skills but also emphasized the importance of patience, persistence, and teamwork in overcoming complex challenges.

Conclusion:

The **Project Ultron: Ultimate Escape Room Challenge** concluded successfully, offering participants an engaging blend of storytelling and problem-solving. The enthusiasm and teamwork displayed by the participants made the event highly memorable. Overall, the event reflected Ordinateur’s commitment to promoting creativity, critical thinking, and experiential learning.
