

2021-2022

Name of the Department/Society: WDC

Name of the Event 7: Webinar on women's health and deficiencies

Date of the Event: 25th September 2021

Because of biological and gender-related distinctions, being a man or a woman has a substantial impact on health. Women's and girls' health is of particular significance since they are disadvantaged in many nations due to prejudice based on sociocultural factors. Women and girls, for example, are more vulnerable to HIV/AIDS than men.

WDC Hansraj College presented an educational discussion on the topic of Women Health and Deficiencies in order to benefit this cause and raise awareness on September 25, 2021 at 5 PM.

The speaker for the session is Ms Preeti Gupta. It was indeed an insightful session where the speaker made us aware about various health issues and also their remedies. She also talked about how women shape the society and why is it important for them to take good care of themselves. More than 100 people joined the webinar and also interacted and asked questions from the speaker.
