

2019-2020

Name of the Department/Society: BOTANIQUE

Name of the Event 3: - Seminar on "The unexpected joys of travelling the tricky terrains in biomedical research." by Dr. Pallavi kshetrapal

Date of the Event: 16/10/2019

The Botany Department of Hansraj College, under the aegis of DBT star College and Science Setu series with translational health science and technology institute, DBT organised a seminar on "The unexpected joys of travelling the tricky terrains in biomedical research."

The lecture was delivered by Dr. Pallavi kshetrapal (an alumnae of Botany Department, Hansraj College) from TSHTI (Translational health science and technology institute), Faridabad.

She is a molecular geneticist, obtained her PhD from CCMB (Centre for Cellular and Molecular biology), Hyderabad. She explained in brief about her work; identification and validation of biomarkers circulating in maternal bodily fluids associated to adverse pregnancy outcomes. She also talked about cellular and biochemical pathways functioning in the human placenta for maintaining a healthy pregnancy. It was an interactive session and relates to "Career by choice" and is enjoyed by the students who learned a lot from it.
