NAAC ACCREDITED 'A++' GRADE COLLEGE

Program was divided into three activities.

First activity: Go Organic

Neem-based organic manure is frequently utilized in order to protect plant roots from nematodes, soil grubs, and termites. It also possesses pesticidal and fertilizing qualities. In India, neem cake is used to fertilize paddy, cotton, and sugar cane, among other crops. The presence of bioactive compounds in neem-based products is responsible for these qualities. We are also aware of the negative consequences of chemical fertilizers and pesticides. So we decided to make our own neem-based manure and apply it to the plants in our Chemistry Department in order to preserve the soil from contamination.

Second activity: Avoid Plastic bags

In the second activity, we used bits of clothing that were left over after stitching or that were not used in the bag-making process. During the program, these bags were on exhibit. This was done in order to avoid using polybags.

Third Activity: Paper Bag Making -Innovative Waste Management

The third activity was to create paper bags. Waste/already used paper was used to make it more environmentally friendly. This activity encouraged participants to come up with unique ideas.
