A session on “**Basics of Microsoft PowerPoint**” was initiated by International Finance Student Association (IFSA-Hansraj), to boost the creativity, spontaneity, and interactivity of the students in such a way that they save time in presenting their cases with clarity and perform better in the corporate world.

This informative session took place 18.01.2022. In this session, we discussed that PowerPoint is a tool used to communicate your ideas effectively through visual aids that look professionally designed and yet are easy to make.

PowerPoint is often used to create business presentations, but can also be used for educational or informational purposes. The presentations are comprised of slides, which may contain text, images, and other media, such as audio clips and movies. Sound effects and animated transitions can also be included to add extra appeal to the presentation. The design features of PowerPoint support customization of the appearance and format of the slides.

PowerPoint comes with a set of preloaded themes or templates to choose from that range from simple color changes to complete format layouts.

Apart from these it also includes all basic text editing and styling options.

With such sessions in our boot camp, the members of IFSA brought many laurels to society by winning various competitions at the university and national levels.
