2019-2020

Name of the Department/Society: Department of Physics and Electronics/LUMEN
Name of the Event 2: Workshop on "**CYBERBYTE**"
Date of the Event: 16th January 2020

A student workshop entitled "**CYBERBYTE**" was conducted by Technical head of the society Mr. Vipin Kumar, on 16th January 2020. It was a very interactive session between the students and Mr. Vipin as useful information was shared on hacking and also hands on session was performed by hacking his own android device.

The theme of the workshop was on various forms of hacking and focus was on Phising and Android hacking. Phising, virus, cookies, UI redress, spoofing, cracking password are the various forms of hacking which were discussed. In Phising the hackers intends to steel critical information of users like Master card details, account password, etc. By key logging the hackers try to steal the login credentials. They try to replicate the original information of the website and interact with the users and steal the critical information. Whereas Virus, a hacking mode is used to corrupt the information on our website or devices and generally they are discharged into the filters of our devices. Android hacking includes sophisticated security breaches and barge into our calls in an unsecured internet connection.

The young audience were really enlightened by the whole session.
