Action Taken Report on the basis of Students' and Parents' Feedback

2019-2020

The overall feedback for teaching and effectiveness of learning was found to be exceptionally good by the students and the parents. We analysed the feedback and observed areas for improvement

Observations	Actions and Initiatives
1. Class Participation by students	Teachers were encouraged to adopt more participative teaching methodology, especially in Skill Enhancement Courses.
2. More emphasis on latest developments in the respective subjects	The Faculty Development Centre and Various academic and non-academic societies of college are organising talks/lectures/workshops. These additional resources have helped to sensitize faculty and students to latest developments in every field.
3. Research Exposure	In the year 2019-2020 internship cell organised workshop on Basics of Research and Paper Publication with the Team Research Bulb
4. Industry Exposure for the Students	College has niche societies like Finance and Investment Cell and Marketing Society Markus. Successful youth programmes like Young Leaders Programme organised by Marcus was very well received. Industry exposure for Economics and Commerce students has been widened with numerous workshops and seminars .Details. are available on our website.
5. Need for Experiential Learning	It was observed that experiential learning should be embedded into the learning process. To ensure this, Internships and Entrepreneurial ideas have been promoted through an active Internship Cell and Entrepreneurship and Incubation Cell.
