

The India International Science Festival (IISF) 2023 was held from January 17, 2024 to January 20, 2024 in Faridabad, Haryana. The festival was organised by the Department of Science and Technology (DST), Govt. of India and its autonomous organisation National Innovation Foundation-India was the coordination and implementation body of IISF 2023. The Department of Biotechnology (DBT) institutes Regional Centre for Biotechnology (RCB) – Translational Health Science and Technology Institute (THSTI) located in Faridabad (Haryana) was the host institute of the grand event. We visited IISF on 19th Jan, 2024. Total 9 students visited with two teachers Dr. Shailendra Kumar Singh and Dr. Ashish Kumar Singh.

There were various workshops, exhibitions of different research and science related institutions. People from other countries came there to give their experience. The core focus was on science and science oriented research. We got the opportunity to see the Seismometer and how it works, rocks found in himalayas, ores like chromite etc. We stayed there for around 3 hours and all of us enjoyed the festival. It was a delightful experience.
